

ENVIRONMENTAL POLICY

M^a DEL TURA FEIXAS, S.A. has set environmental protection as a priority objective of the company. To this end, it works to continuously improve pollution prevention, reduce the environmental impact of its activity and comply with laws, regulations and other environmental requirements.

The company has developed the following guidelines to achieve its environmental objectives.

- We understand environmental protection as an important responsibility of the company's management, and we ensure that it is carried out in all functions and in all areas.
- The protection of the environment requires responsible behaviour of all the people who make up M^a DEL TURA FEIXAS, S.A.
- The central task of environmental policy lies in reducing the environmental impacts derived from the activity, such as waste management (meat by-products, hazardous waste mainly from maintenance activities and waste similar to urban waste, mainly cardboard, plastic and paper from our offices), wastewater production and others.
- We declare our commitment to comply with the environmental legal provisions in force applicable to the nature of our activities, as well as the other requirements to which the organization subscribes
- We periodically review the state of environmental protection in order to verify the progress made and adapt the objectives and goals to the nature and extent of the environmental impacts caused by our activities, our products and our services. The environmental management programs prepared annually on the basis of this revision make it possible to establish a process of continuous improvement and pollution prevention.
- We inform and train our employees extensively on the environmental aspects linked to the development of their activities within M^a DEL TURA FEIXAS, S.A. and we motivate them so that their behaviour in the workplace reflects this environmental awareness

To develop these basic principles, M^a DEL TURA FEIXAS, S.A. formulates **environmental objectives and goals every year, which will always be measurable and consistent with this Environmental Policy and with the principles formulated therein and monitors them verifying compliance.**

Given the current economic situation, we believe it is essential to influence the reduction of energy consumption (water-electricity-diesel) as one of our main objectives, together with a reduction in the consumption of auxiliary materials and a better segregation and recovery of our waste.

The Environmental Policy will be available to the public and will be adequately disseminated to all employees.

Both the company's management and the employees in all areas are responsible for the proper development of the Environmental Management System. The Environment Manager will be in charge of the effective implementation and maintenance of the Environmental Management System.

The company's management
